

The H. MARTIN FOUNDATION Far East Humanitarian Services (HMF) is planning to establish their International Main Headquarters in collaboration with the Government of the United States of America. I am asking you to stand behind the establishment of H. MARTIN FOUNDATION Far East Humanitarian Services USA as the International Main Headquarters and help set up branch offices in every state.

With unemployment on the rise and educational costs at an all-time high, I ask you to promote common sense, job-creation and affordable educational programs. I am writing this petition to urge you to support the humanitarian projects and programs of the H. MARTIN FOUNDATION Far East Humanitarian Services.

These projects and programs would open up Educational Opportunities that are becoming more difficult to attain, such as:

Free Childcare Centers with professional staff providing services 24 hours per day, 7 days a week;

Before and After School Programs that are needed at our school districts to give our children and students a place to go before and/or after school and learning programs that are lacking or being discontinued;

Scholarship Programs at all levels of education to help increase the quality of education, especially in the economically challenged school districts;

Employment opportunities and training to help bring back to many people the dignity that they have lost in the current economy.

Millions of families are adversely affected by the current economic situation and we can't wait any longer! We recognize, as a government elected official, you are working on making the necessary changes to improve the present condition. Now, I am writing to elicit your support by asking you to take a position that will hasten and bring economic solutions to the problems of the nation which H. MARTIN FOUNDATION Far East Humanitarian Services' Resources and Programs can provide.

Sincerely,
